

**Agenda**  
**WATER RESOURCES ADVISORY COMMISSION**  
**Monthly Meeting**

June 05, 2014, 9:00 AM  
District Headquarters - B-1 Auditorium  
3301 Gun Club Road  
West Palm Beach, FL 33406

**EXECUTIVE SUMMARY AGENDA**

**FINAL**

**1. Call to Order – James J. Moran, WRAC Chairman**

**2. WRAC Member Issues**

**Summary**

This agenda item allots WRAC members time to share pertinent information with other members and the public. Comments should be kept brief. If extended time is needed, please consider requesting the topic be added as an agenda item at the next meeting.

**3. Overview of Phosphorus Limits for Everglades National Park –  
Temperince Morgan, Division Director, Everglades Policy and Coordination, SFWMD**

**Summary**

This agenda item will provide the WRAC with key facts about the phosphorus limits that currently apply to Everglades National Park. The presentation will provide information regarding the current compliance methodology for both Shark River Slough and Taylor Slough including the phosphorus criteria, the sampling locations, and the calculation method.

**4. Lake Okeechobee Regulation Schedule; Middle and Upper Subband Flexibility –  
Jeff Kivett, Division Director, Operations, Engineering and Construction, SFWMD**

**Summary**

The purpose of this agenda item is to discuss the scope and schedule for an investigation

of the flexibility in the middle and upper bands of the 2008 Lake Okeechobee Regulation Schedule (LORS 2008). The presentation will provide an outline of the goals and team that will design and evaluate release guidance ideas that achieve better performance within the authorization of LORS 2008. Opportunities to test specific ideas for the “make-up” release provision in the United States Army Corps of Engineer’s (USACE) Water Control Plan will also be discussed.

**5. Overview of District Flood Control Operations and Wet Season Readiness – Jeff Kivett, Division Director, Operations, Engineering and Construction and Karen Estock, Division Director, Field Operations and Land Management, SFWMD**

**Summary**

Authorized in 1949, the Central and Southern Florida (C&SF) project was constructed between 1950 and 1970 by the United States Army Corps of Engineers (USACE) with the flood control district as the local sponsor. The extensive flood protection system is operated and maintained by South Florida Water Management District in accordance with USACE criteria. The system was designed to wall off the Everglades and drain excess water to the ocean. This presentation will outline a chronology of water management changes and present an overview of current flood control operations.

**6. Staff Reports**

**Summary**

This agenda item allows South Florida Water Management District staff to provide brief verbal reports regarding the status of key agency projects and initiatives.

**7. General Public Comment**

**8. Adjourn**
