NOW HIRING: Applying for a SFWMD Job Just Got Easier

New streamlined process allows candidates to apply for work using all mobile devices, positions are currently available at all career levels

Search & Apply for Jobs

West Palm Beach, FL - The South Florida Water Management District (SFWMD) has upgraded technology to its career website platform making the job application process less time-consuming and applicable to all mobile devices.

"The new platform is designed to work in a more responsive manner," said SFWMD Human Resources Bureau Chief Christine Austen. "No matter which mobile device is used - a smart phone, phablet, tablet or laptop - the content automatically adjusts to fit the screen, so applicants can search and apply with ease. Job seekers will now be able to get the same experience and full functionality as a desktop screen."

Other features of the new site include an option to upload a résumé in one step, which then automatically populates application form fields. An applicant can also create a profile and sign up for automatic email alerts when positions open matching his or her profile criteria. Additionally, a future feature, currently in the construction phase, will allow candidates to use their LinkedIn profiles to automatically create SFWMD careers profiles.

With a 1,450-person workforce, the SFWMD is as diverse as the water resources and ecosystems the agency manages, restores and protects. At this present time, several positions are available at various levels covering a multitude of careers including administrative, skilled craft, science, engineering, information technology, management and other positions.
